PATIENT CASE STUDY

DISCHARGE SUMMARY

HISTORY OF PRESENT ILLNESS

Patient is a woman being admitted for home care due to St. II Pressure Ulcer to left heel and need for wound management. Patient has past medical history significant for type 2 diabetes, hypertension, and nicotine dependence. According to patient's husband, John Smith (contact), she has exhibited no cognitive issues or functional deficits prior to this episode of care. The patient has been noted to have a good appetite and denies problems with sleeping or weight changes. She also denies any suicidal ideations and visual/auditory issues.

HH MSW DISCHARGE VISIT

Patient exhibits marked improvement in her mood and is more alert and oriented. Patient's emotional status has exhibited evidence of improvement. We will share ideas to assist with patient's continued improvement and how to slowly increase her interaction with the community with the caregiver.
